Sai Sathwik

Software Engineer / Python Developer / AI & Data Enthusiast

Mobile : +91 8341672083 | dennysathwik@gmail.com | linkedin-profile | portfolio.site

Education

Malla Reddy College of Engineering and Technology — Hyderabad,Telangana
Computer Science Engineering,CGPA:7.78/10 — *2022-2026*

Nalanda Junior College — Kothagudem,Telangana
Intermediate,Percentage:78 — *2020-2022*

Sri Vidya School — Kothagudem,Telangana
SSC,CGPA:9.5 — *2020*

Projects

AI Automated Investment Strategy Advisory | *Python, MySQL, Flask, Pandas* (Git.live)

- Developed an AI-powered investment advisory system to analyze market trends, user risk profiles for personalized investment recommendations.
- Built a Flask-based backend integrated with MySQL for secure data management and efficient retrieval of financial information.
- Processed and analyzed financial datasets using Pandas to generate actionable insights and support investment decision-making.

Basket Buddy | *HTML, CSS, JavaScript, MongoDB* (Git.live)

- Built a full-stack e-commerce platform with product browsing, advanced search, category-based filtering, and shopping cart functionality.
- Implemented dynamic search and filtering features to improve product discovery and overall user experience.
- Developed a responsive UI to enhance user experience and streamline checkout flow.

Blockchain-Based Certificate Verification System | *Blockchain, IPFS* (Git.live)

- Designed a decentralized system to ensure certificate authenticity and tamper-proof verification.
- Implemented secure hash storage using IPFS to prevent data manipulation.
- Prevented certificate fraud by implementing secure storage of certificate hashes.
- Applied blockchain principles to create a tamper-proof and transparent verification process aligned with institutional compliance requirements.

Pneumonia Detection System | *Python, CNN, TensorFlow, OpenCV, NumPy* (Git.live)

- Built a Convolutional Neural Network (CNN) model for medical image classification using chest X-ray datasets.
- Achieved high classification accuracy through optimized preprocessing and feature extraction techniques.
- Processed and analyzed large datasets using OpenCV to improve model consistency.
- Evaluated model performance using accuracy metrics and visualized results for analysis and validation.

Technical Skills

Languages : Python, SQL, JavaScript
Web Development : HTML5, CSS3, React.js
Database : MongoDB, MySQL
Tools : Git, GitHub, VS Code, Google Cloud
Machine Learning & Visualization : OpenCV, NumPy, Pandas, Power BI, Tableau, Matplotlib
Core CS : OOPS, DBMS, Operating Systems, Computer Networks, SDLC, Cloud Computing

Certifications

Oracle Cloud Infrastructure: Oracle
Cloud Operations on AWS: Coursera
Cisco Introduction to Networks: Cisco Networking Academy
Cambridge English C2 Proficiency: University of Cambridge
