EDUCATION

Malla Reddy College of Engineering and Technology <i>Computer Science Engineering, CGPA: 7.77 (upto 4-1)</i>	Hyderabad, Telangana 2022-2026
Nalanda Junior College <i>Intermediate, Percentage: 78</i>	Kothagudem, Telangana 2020-2022
Sri Vidya School <i>SSC, CGPA: 9.5</i>	Kothagudem, Telangana 2020

PROJECTS

Basket Buddy <i>HTML, CSS, Node.js, MongoDB</i>	2024
- Built a full-stack e-commerce platform with dynamic product search, filtering, and real-time inventory updates. - Designed a responsive and user-friendly interface with advanced search, filters, and seamless checkout for improved customer experience. - Developed a responsive UI to enhance user experience and streamline checkout flow.	
Blockchain-Based Certificate Verification System <i>Blockchain, IPFS</i>	2025
- Designed a decentralized system to ensure certificate authenticity and tamper-proof verification. - Implemented secure hash storage using IPFS to prevent data manipulation. - Prevented certificate fraud by implementing secure storage of certificate hashes. - Applied blockchain principles to create a tamper-proof and transparent verification process aligned with institutional compliance requirements.	
Pneumonia Detection System <i>Python, CNN, TensorFlow, OpenCV, NumPy</i>	2025
- Built a Convolutional Neural Network (CNN) model for medical image classification using chest X-ray datasets. - Achieved high classification accuracy through optimized preprocessing and feature extraction techniques. - Processed and analyzed large datasets using OpenCV to improve model consistency. - Evaluated model performance using accuracy metrics and visualized results for analysis and validation.	
AI Automated Investment Strategy Advisory <i>Python, SQL, Power BI, Tableau</i>	2026
- Developed an AI-driven system to analyze market trends, risk profiles, and portfolio performance for investment recommendations. - Built interactive dashboards using Power BI for real-time financial insights and reporting. - Generated automated reports for financial insights and decision-making.	

TECHNICAL SKILLS

Languages: Python, HTML, CSS, SQL
Data Analytics and Visualization: Tableau, Power BI, Microsoft Excel, Pandas, NumPy, Matplotlib
Concepts: Data Cleaning, Data Visualization, Cloud Computing, Agile Methodology, SDLC
Tools & Platforms: Git, GitHub, Google Cloud Platform, VS Code
Data Structures & Algorithms: Solved 150+ problems across LeetCode, CodeChef, Codeforces

CERTIFICATIONS

Oracle Cloud Infrastructure: Oracle
Cloud Operations on AWS: Coursera
Cisco Introduction to Networks: Cisco Networking Academy
Cambridge English C2 Proficiency: University of Cambridge
